**SUBJECT: Award-Winning Film Maker to Produce Nuclear Energy Documentary**

I recently had the good fortune to become acquainted with an individual named Robert Stone. Mr. Stone is a multi-award-winning, Oscar-nominated and Emmy-nominated documentary filmmaker. (attached is Mr. Stone's biography)

The exciting news is that Mr. Stone has started production called "Pandora's Promise", a feature-length pro nuclear documentary. ( attached is a synopsis of the project) In the synopsis you will note that Idaho and in particular the Integral Fast Reactor project will be highlighted in the film.
